Subject: Fwd: Task #2597 - Bear Cyn Lease expansion technical response

All:

Just an FYI (see attached email) informing you of our tentative deadline (August 31st) for completing our tech review of Bear Canyon's latest technical response document received last Thursday (8/10). It is my understanding that Mark Reynolds also hand-delivered hard (and CD's?) copies of the redlined/strikeout technical response to the USFS and BLM Price field offices last week.

I realize this is a very short timeframe, but we're going to do our best to try and meet it and keep the process moving. If possible, we would appreciate receiving any federal agency review comments/concerns on the operator's latest submittal by the end of August as well.

If you have questions or require additional information in this regard, please contact me or Joe Helfrich at your earliest convenience.

Thanks for your continued cooperation and assistance in working together to process this application in a timely manner.

P.S. We have another field visit scheduled on August 22nd to look at (confirm locations of) some additional water sources that were identified by the Huntington Cleveland Irrigation Company during our August 9th meeting in Huntington (2 stock ponds and 2 water troughs). These may be added to the water monitoring plan if not already included. The plan is to meet at the Morhland loadout area (as per our previous onsite visits) at 9:00am. If you are interested in participating please contact Joe Helfrich to make sure we have you on the proposed attendees list.
